DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-22, drawn to a slipsheet compactor, classified in class 100, subclass 179.

Group II. Claims 23-27, drawn to a method for compacting a slipsheet, classified in class 100, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group II and Group I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as one having a plunger for pre-compressing the slipsheet and another plunger for further compressing the slipsheet. Additionally, the apparatus as claimed can be used to practice another and materially different process such as for compressing cardboard.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
